Mason Color High Performance Pigments for Organic Coatings

Mason Color Brown 7153

Pigment Brown 33 – Zinc Iron Chromite Brown Spinel

Mason Color 7153, a high performance zinc iron chromite pigment, is designed to provide outstanding heat resistance, chemical stability and outdoor durability. This mixed metal oxide pigment meets the demanding performance requirements of the military, aerospace and architectural industries. Mason Color 7153 is recommended for all coating formulations requiring the ultimate in chemical, heat and UV durability.

Recommended Coatings Applications: Powder coatings, military topcoats, radiation curable coatings, architectural finishes, coil coatings, exhaust parts, high solids coatings, waterborne technology, and cool coatings.

CAS # 68186-88-9

CI Color: PBr 33

Typical Properties:

| | |
|--------------------------------|-----------|
| Specific Gravity: | 5.5 |
| Oil Absorption: | 16 |
| pH: | 6.3 |
| % Retained on 325 Mesh: | <0.1% |
| Crystal Structure: | Spinel |
| Heat Stability: | >1000°C |
| Weatherability: | Excellent |
| Acid Resistance: | Excellent |
| Alkali Resistance: | Excellent |
